### Description:

*RM.NFT.3.TheLanguageGame* is a 45-second silent square video of 90 images rendered in 3 colors against a black background. The drawings symbolize a human head, thought bubble, and speech bubble. Each contains a different drawing.

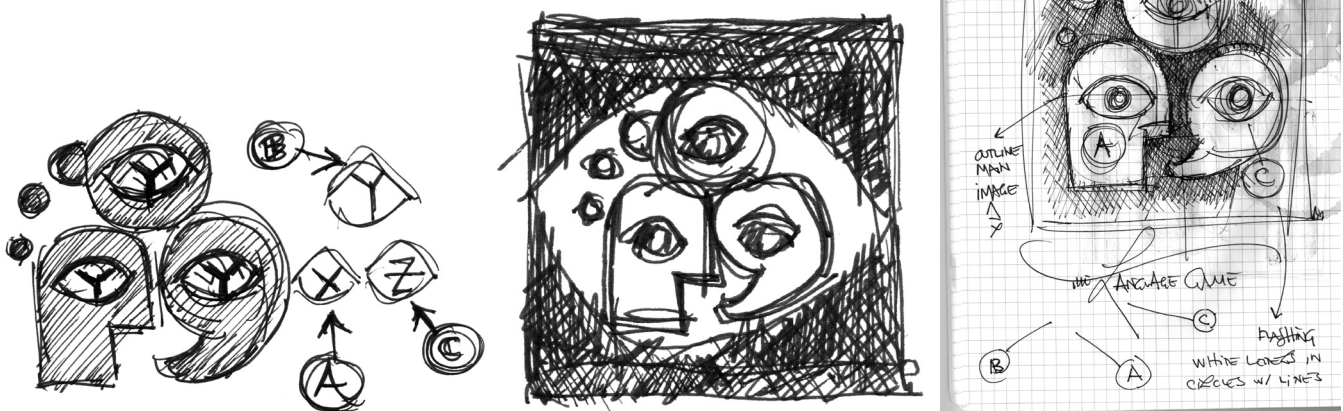

### Concept:

A simple narrative expresses the disconnect in language between words (symbols) as they are seen, conceived, and expressed. I wrote a poem about it:

*I spoke of what I thought I saw.  
But none of it was the same.  
That is the problem we humans have  
When we play The Language Game.*
